

DDT Pesticide

A silver bullet against insect pests

APPLICATION

Successfully controls insect pests, such as Colorado potato beetle, corn earworm, cotton bollworm, the tobacco budworm and other insect pests.

Scientific tests have shown that when properly used DDT kills a host of insect pests.

- Spray fruit trees and fruits will be bigger, juicer and free from unsightly worms.
- Spray crops and increase yields, get 25 more bushels of crop per acre with DDT.

Caution: Avoid contact with face, eyes or skin.

Avoid breathing vapors or spray mist. Do not allow spray to contact food or water supplies.

Keep out of reach of children
