

## What is happening to the Bald Eagle?

### Instructions:

Your team of scientists must determine what happened to the bald eagle based on the clues in the bag. They fit together to tell the story. Put the clues together and come up with a logical story line. Time is of the essence! The eagle numbers are dropping fast.

### List of Clues:

- ✓ River
- ✓ Raindrops
- ✓ Insect
- ✓ Small fish
- ✓ Farmer's crop
- ✓ Large fish
- ✓ Plankton
- ✓ DDT

### Group Product:

Your group will create a diagram which illustrates clearly the impact of DDT on the environment, most specifically as it relates to the bald eagle population in the United States.

Read the rubric fully before your begin to insure that you understand the requirements.
