Construction Stage 2

Contractor completed stage 1 and begin stage 2 work this morning. Commuters are urged to plan for slightly longer commutes, use caution around the work zones and be on alert for workers and equipment.

Commuters are reminded to pay special attention to permit & daily parking location signs, traffic controls/detour signs, and message boards that will be updated throughout the project. Please reference Stage 2 Parking Designation Exhibit for more information.

Stage 2 construction involves the construction of the new Pace Bus staging area and associated utility work. This will required the relocation of the parking stalls west of the RR tracks, ADA spaces, and motorcycle parking area. Parking area north of the ATC building and drop-off (kiss-n-ride and taxi) area will not be available.

Temporary taxi will be allowed to park along the west side of the ATC building. Motorcycle parking can park at the ends of the parking isles. Commuters should use the East Parking Lot for ADA parking and for drop off and pick up.

Access to the ATC building and platform will be maintained throughout construction. All surrounding businesses will be open during construction.

Commuter should note the location of the daily fee and permit parking area. Permit parking areas are available for daily fee users after 8 am. Temporary daily permit parking along Lincoln Avenue is available for commuters.

Stage 2 work is anticipated to be completed in end of July 2018, weather permitting.
