**Subject:** ISO Charts

Mr. Beneke-

The following chart represents the distribution of BCEGS classifications for all 1-10 classified communities in the State of Illinois. Aurora is currently the sole Class 2 community in Illinois and the most favorable classified in the entire state as there are no Class 1 jurisdictions presently.

I hope this information is useful for you. I know you are very proud of the work done in Aurora, and this chart reflects that you have good reason to be so proud.

Best,

Dale
