

SPECIES	COMMON NAME	TYPE	DESCRIPTION	POLLINATOR BENEFITS/ECOSYSTEM SERVICES	CULTURE
Cercis canadensis 'Forest Pansy' (Redbud)	eastern redbud	Small Tree	grows 15 to 25 feet tall with a slightly wider spread; 4 Season interest Low maintenance, Flowering Tree	pollinated primarily by Henry's Elfin butterfly Hummingbirds	Easily grown in average, medium moisture, well-drained soils in full sun to part shade. Part shade is best in hot summer climates. Performs best in moderately fertile soils with regular and consistent moisture. Avoid wet or poorly drained soils. Since this tree does not transplant well, it should be planted when young and left undisturbed. Height: 18-24 in Width: 18-24 in Soil Conditions: Moist/Well Drained Flower Color: Blue
Geranium 'Brookside'	Geranium	Flowering perennial	Blue flowers with white eyes, long bloom time. Compact mound of lacy foliage stays attractive all season. Leaves turn red-orange in fall	Attracts butterflies	Bloom Time: June, July, August, September, October Width: 12-18 in Soil Conditions: Moist/Well Drained Flower Color: Yellow
Hakonechloa macra 'All Gold'	Japanese Forest Grass	Grass/sedge	Golden-chartreuse foliage	Seeds attract songbirds	Bloom Time: July, August Height: 24-36 in Width: 24-36 in Soil Conditions: Moist/Well Drained Flower Color: Gold
Solidago flexicaulis	Broad-leaved Goldenrod	Flowering perennial	Stems zig-zag from leaf to leaf	Attracts butterflies and other pollinators	Bloom Time: July, August, September Width: 3-4 ft Soil Conditions: Moist/Well Drained Flower Color: White
Aronia melanocarpa 'Low Scape'	chokeberry	Shrub	Loads of white flowers in spring, purple-black fruit in summer; autumn foliage red with a touch of orange	Attracts multiple pollinators	Bloom Time: May Width: 3-4 ft Soil Conditions: Moist/Well Drained Flower Color: Yellow
Diervilla sessilifolia	bush honeysuckle	Shrub	Wide bright white margins surround dark green center leaves; yellow flowers	Attracts multiple pollinators	Bloom Time: July, August Height: 3-4 ft Width: 3-4 ft Soil Conditions: Moist/Well Drained Flower Color: White
Viburnum carlesii	Koreanspice viburnum	Shrub	Sweetly scented blush-pink blossoms & ornamental fruit	Attracts butterflies & birds	Bloom Time: April, May Height: 18-24 in Width: 24-36 in Soil Conditions: Moist/Well Drained Flower Color: Yellow
Coreopsis 'Creme Brulee'	tickseed	Perennial	Thread-leaved, vigorous bloomer	Attracts butterflies and other pollinators	Bloom Time: June, July, August, September, October Height: 20-22" Spacing: 30-36" Blooms In: May-Jun
Peony 'Border Charm'	Peony	Perennial	plume-flowered plants have ultra-handsome fern-like foliage, (usually dark glossy green) and stiff stems that always hold the elegant plumes aloft without any staking	Attracts butterflies and other pollinators	Flower Color: Yellow Exposure: Sun to Part Shade

Astilbe arendsii	astilbe	Perennial	clump-forming perennials which feature graceful, fern-like mounds of mostly basal, 2-3 ternately compound leaves, usually with sharply-toothed leaflets, and tiny flowers densely packed into erect to arching, plume-like flower panicles rising above the foliage on slender, upright stems	Attracts bees, butterflies and moths	Height: 1.00 to 1.50 feet Spread: 0.75 to 1.00 feet Bloom Time: July Bloom Description: Deep red Sun: Part shade to full shade Water: Medium
Campsis radicans 'Stromboli'	Trumpet Creeper	Perennial Vine	Woody vine which grows up to 30 feet tall-uses aerial rootlets (tiny roots which grab onto trees, bushes, other vines, fences, or walls) to climb upwards. Best known for its magnificent flowers, bright red blossoms grow up to three inches long. Blooms from June to September.	The flowers of this plant are a major food source of Ruby-throated Hummingbirds. They, along with Bumblebees, are one of the few animals which can reach the nectar inside the long flowers	Sun to part shade Width: 20-25 ft Soil Conditions: Moist/Well Drained Flower Color: Red Bloom Time: June, July
Viburnum x juddii	Judd viburnum	Shrub	This hybrid viburnum produces snowball-type clusters of white, highly fragrant flowers in spring and provides purple leaf color in autumn; 6 to 8 feet high and wide	Viburnums are a great choice for a natural wildlife area or if you simply want to attract birds to your landscape	Moist, well-drained soil, full to part sun
Buddleia x 'Miss Ruby'	Butterfly Bush	Shrub	Noted for its compact habit and remarkably vivid, rich pink blooms. The distinctive magenta flowers are more vibrant than that of any other buddleia variety. Flowers are fragrant--4'-6'. Blooms July-Oct A newer cultivar or a popular native shrub. This compact selection reaches 3 to 5 feet tall. In summer, 'Sixteen Candles' is topped with aromatic, erect, butterfly-enticing white blooms for 4 to 6 weeks. In fall, the leaves turn an attractive yellow	Excellent for use in perennial beds, wildlife gardens and mixed borders-attracts birds, hummingbirds, and butterflies	Prefers well-drained, moist, fertile soils but can tolerate drought once established. Prefers medium moisture
Clethra alnifolia 'Sixteen Candles'	Sixteen Candles Summersweet	Shrub	Aromatic, erect, butterfly-enticing white blooms for 4 to 6 weeks. In fall, the leaves turn an attractive yellow	Attracts Hummingbirds and butterflies	Loves wet locations in partial shade but does fine in average garden soils in full sun. Wandering roots and stems can easily be chopped off and transplanted.
Echinacea purpurea 'Prairie Splendor'	Prairie Splendor Coneflower	Perennial	A compact coneflower that features bright rose-magenta rays surrounding a dark orange center cone. It typically grows in a clump to 24" tall and as wide. Flowers bloom from late spring (two weeks earlier than most echinaceas) to late summer, sometimes with additional sporadic bloom until frost	Cones may be visited by goldfinches or other birds that feed on the seeds and butterflies	Easily grown in average, dry to medium moisture, well-drained soils in full sun to part shade. Best in full sun. This is an adaptable plant that is tolerant of drought, heat, humidity and poor soil.
Penstemon digitalis	Foxglove Beardtongue	Perennial	White flowers occur in a panicle at the top of each flowering stem, and bloom during late spring or early summer for about a month. They are tubular in shape and about 1" long	Attracts multiple pollinators and hummingbirds	Full or partial sun, average levels of moisture, and loamy soil; adapts well to cultivation, is not bothered by disease, and is easy to grow

Rudbeckia fulgida var.sullivantii 'Little Goldstar'	Little Goldstar Black- eyed Susan	Perennial	rugged green foliage and sturdy stems give way to hundreds of cheery, black-eyed, 2 1/2" golden-yellow daisies that persist for weeks beginning in mid-summer and lasting well into early fall	Attracts butterflies, songbird and butterflies	Well drained soil in full sun to part shade
